

EMBRACE THE  
QUALITY AND  
RICH CULTURE  
OF **CEILAO**

Sri Lanka is renowned for having high value coconut products given the rich history of the coconut tree and its benefits. Our tropical climate creates the perfect atmosphere to yield superior grade coconut related products.

CEILAO is a brand that focuses on the rich history of Sri Lanka, as it was the first name given to Sri Lanka by the Portuguese. This brand ensures that the coconut tree or the "Tree of Life," elevates the experience of our customers when using our products. Our range uses most parts of the coconut tree which contributes to many industries and people all over the world.

***"Embrace the quality and rich culture of CEILAO"***

## COCONUT CHARCOAL BRIQUETTES

Coconut charcoal briquettes are a popular choice for grilling and barbecuing due to their eco-friendly nature and efficient burning properties. Made from the shells of coconuts, these briquettes are sustainable, as they utilize a byproduct of the coconut industry.

### **BENEFITS OF COCONUT CHARCOAL BRIQUETTES:**

**Eco-Friendly:** They are made from renewable resources and produce less smoke compared to traditional wood charcoal.

**High Heat Output:** Coconut charcoal burns at a higher temperature, making it ideal for grilling meats and vegetables.

**Long Burn Time:** These briquettes tend to burn longer than standard charcoal, reducing the need for frequent refueling.

**Low Ash Production:** They produce minimal ash, which makes cleanup easier.

### **USES**

**Grilling:** Perfect for BBQs and outdoor cooking

**Indoor Cooking:** Can be used in stovetops and traditional clay stoves.

**Shisha or Hookah:** Popular in hookah lounges for their clean burn.

### **TIPS FOR USE**

**Lighting:** Use a chimney starter or natural fire starters to light them more efficiently.

**Storage:** Keep Briquettes in dry place to prevent moisture absorption.

## COCO PEAT BRIQUETTE

Made from 100% coir peat and husk chips, an economical, eco-friendly option for home gardeners and commercial growers.

### ADVANTAGES:

- Water absorption increases volume 10 times. (8 liters from one 600g briquette)
- Beneficial for seed germination
- Excellent natural medium for soil conditioning
- Ideal for potting in small growing containers

100% Peat  
100% Chips  
Composition percentages  
from Peat and Chips  
As per buyers request

## COMPRESSED BLOCKS

These are produced by compressing peat and chips to form a block weighing 05kg. Chips are some of the best soil conditioners in the world and can be used as an alternative to Fir Bark in the farming and agricultural industries. Coco peat is a byproduct gained during the extraction of coir fiber from the coconut husk. It is a 100% natural, spongy cellulose organic plant growing medium. Compressed 05kg blocks can also be purchased separately as Peat and Chips.

### ADVANTAGES:

- Worm growth
- Nutrient balance
- Disease-resistance
- Resists fungal growth
- 100% natural and renewable resource
- 05kg compressed into a block adds a value in transportation and also in storing

Low EC - Below 500 ms  
High EC - Above 1000 ms

## 100% PEAT

Composition percentages from Peat and chips as per buyers request

## COCO PEAT PLANTER BAGS

Made from 100% natural coco chips and coco peat, planter bags are an excellent eco-friendly medium for limited spaces.

### ADVANTAGES:

- Easy handling alternative to pots
- Ready to use and reusable
- High porosity for healthy root growth
- Durable - lasts for more than 2 years
- Versatile - adjustable depth levels
- Eliminates the cost of compost
- Increases the efficiency of drip irrigations

- Green houses
- Indoor and outdoor cultivations
- Horticulture sector
- Floriculture sector
- Specially designed for cannabis growers

Low EC - Below 500 ms  
High EC - Above 1000 ms

## COCO PEAT GROW BAGS

Manufactured using natural, organic coco peat, grow bags are ready to use and can be mixed to required specifications.

### ADVANTAGES:

Ideal for hydroponics and soilless cultivation

Durable - lasts more than 2 years

Cost effective

100% natural medium

PH levels 5.5 - 6.5

Best substitute for peat moss

Horticulture sector

Floriculture sector

Hydroponic growers

Specially for, Tomato | bell pepper | green houses

Low EC - Below 500 ms  
High EC - Above 1000 ms
